PROFESSIONAL EXPERIENCE

SYSystem Co., Ltd.   Jul 2020 - Jul 2023

Software Engineer | Assigned to Toyota Systems Corporation   Nagoya, Aichi, Japan

- Developed and maintained internal applications, utilizing a combination of front-end, back-end, and database technologies to support core business functions.
- Provided technical support for the use of the OutSystems platform, resolving technical issues faced by clients and delivering tailored solutions to meet their functional requirements. Acted as a liaison with OutSystems to verify bugs and ensure timely fixes, as well as to propose new feature requests when client needs could not be met with existing functionalities.
- Designed and implemented API to connect with Snowflake for data access, enabling different project teams to retrieve data based on predefined access permissions.
- Developed customized software solutions by conducting technical surveys, analyzing client needs, and translating technical requirements into practical implementations, offering recommendations that improved development efficiency.
